

ALBERTO DI LULLO – Eni

Alberto Di Lullo is currently Senior Knowledge Owner in Advanced Engineering Systems and Troubleshooting and works in the Technical Authority, Operating Assessment and Knowledge Consolidation department.

He joined Eni in 1991, initially working in R&D and later extending his activity to flow assurance, field design and operational troubleshooting.

Now he is specifically involved in CCS and hydrogen projects. He is author of several papers and patents and participates actively in the organization of international conferences.
